Farhan Ali
PARTNER

I had an excellent experience working with Farhan on a complex and unique car accident injury case. He took the time to truly understand the details and challenges of my situation, handling everything with care and professionalism. Living in another state and time zone, I especially appreciated how flexible and responsive he was with communication. Farhan always made sure I understood my legal options and kept me informed, even when things got complicated. He explained everything clearly and was incredibly patient with my questions. His dedication and advocacy never wavered, I felt fully supported throughout the entire process. I'm very grateful for his hard work and would confidently recommend him to anyone looking for a smart, reliable, and compassionate attorney.

New Pennsylvania Driving Law Prohibits Hand-Held Cell Phone Use

Pennsylvania took a big step towards making the roads safer for everyone. On June 5th, Governor Josh Shapiro signed Senate Bill 37 into law. The law, also known as "Paul Miller's Law," bans the use of all hand-held devices while driving – even if the driver is temporarily stopped in traffic, at a red light, or due to any other type of momentary delay. The bill is named in remembrance of Paul Miller, Jr., who was killed in a crash involving a tractor-trailer in 2010. The at-fault driver who struck Paul reached for their phone while driving. In one instant, Paul lost his life, and his family and loved ones were forever changed.

Injured in a Philadelphia Uber or Lyft Accident? Here's What You Need to Know

Uber and Lyft have become popular transportation options across Philadelphia, offering convenience and affordability. However, when a rideshare ends in a crash, victims are often left confused about their rights and options.

If you were injured in a rideshare accident in Philadelphia, here's what you need to know about liability, insurance, and pursuing compensation.

New Study Reveals Only 25% of Sunscreens Are Safe

Sunscreen is critical when it comes to protecting your skin from the sun's harmful UVA and UVB rays. Sun exposure is a top factor for developing skin cancer, which kills more than two Americans every hour. There are over 9,500 new cases of skin cancer each year, so prevention is key.

Given how important sunscreen is, it should come as a big surprise that, according to a new study, only one-quarter of the products on the shelves are safe and effective to use. With summer, sunny days, and high temperatures looming large, let's take a look at which sunscreens you and your loved ones *can* rely on to keep you safe — and which ones you may want to avoid.
